CALIFORNIA AND ITS RESOURCES.

THIS DAY PUBLISHED, ONE VOLUME DUODECIMO, 390 pp.

THE STATE REGISTER AND YEAR BOOK OF FACTS FOR 1857.

This work embraces full and reliable statistics, concerning each branch of the resources of the State, and a complete exhibit of the finances thereof, including the different county and municipal organizations, carefully prepared and arranged from information obtained through official and other reliable resources. The Agricultural, the Mining, the Commercial, the Mechanical and the Manufacturing interests, each receive such attention as will best illustrate their character, importance and extent. The *Register* also contains such data connected with the operations of the different departments of Government, Federal and State, as are consistent with its general plan, together with the names of the officers in charge thereof, and reference to the history and progress of the different States.

This volume contains the location, cost, capacity and owners' names of each Quartz Mill, Grist Mill, Saw Mill, Water Ditch, and in fact every industrial or mechanical enterprise in the State.

OPINIONS OF THE PRESS

The worth of such a work as this cannot be estimated at a glance only of its contents, and a judgment (albeit correct) formed upon a hasty perusal, would be doing injustice to the book and all connected with its preparation. And its value to our profession will fail to be properly and fully appreciated until we shall, as we must ere long, come to regard it as a book of reference, as indispensable to our convenience as the lexicon of Webster. The statistical, and particularly the election returns, are brought down to the very latest moment, and are scrupulously exact. One of the finest features of the work is the clearness and conciseness with which facts are presented—the book, although by no means bulky, truly merits the motto of *multum in parvo*.—*Alta California*.

We do not hesitate to pronounce this, without reserve, to be the most creditable and at the same time the most useful work issued from the press of our young State. The plan of the work is similar to that of the American Almanac, a standard publication of the highest order, and an indispensable adjunct to the statistical literature of our country. Justly high as that work ranks, we think upon examination the California book will show quite as much ability in compilation and arrangement, and considering the now and crude material out of which it is made up, it will be found, if possible, to be a superior publication. We speak of the *State Register* with peculiar pride, as we are satisfied that it will not only serve to make the resources and character of our State better known abroad, but will also add to the literary and mechanical reputation of our citizens.—*Sacramento Union*.

It is certainly one of the most useful books of the kind we have ever examined.—*State Journal*.

Such a work has been a great desideratum, and its appearance at the present time will be hailed with pleasure by every man, whatever may be his occupation and profession. We have examined the pages of this volume with much care, as well as interest, and we find a great variety of facts and statistics which we consider exceedingly valuable, and which must have cost the compilers much arduous labor and research, as well as heavy expense.—*Globe*.

Filled with the most important and statistical matter we have ever yet seen collected in one volume. There seems to have been nothing of interest left out of the work, which gives a most complete exhibition of the condition of California.—*Chronicle*.

We have no hesitation in saying, that the *Register* is one of the most valuable works that has ever issued from the press of California.—*Herald*.

A most indispensable compendium of matters, consisting of data of our State's commerce, agriculture, arts, sciences, politics, mechanics, minerals, topography, literature, and in fact every practical subject of interest.—*Morning Call*.

Giving information in regard to everything pertinent to our State in the development of her resources, her industrial branches, literary and scientific institutions, and Federal and State official departments. No work ever emanated from our press which is so well adapted to open the eyes of our Atlantic brethren to the vast resources within our midst, and is better calculated to bespeak confidence, by a dissemination of information, than any source we are aware of.—*Town Talk*.

The most valuable boon ever presented to this people.—*News Letter*.
No business man should be without a copy, and a more useful book could not be placed in the family library.—*Wide West*.

It is to California what Greeley's Almanac and DeBow's Statistics are to the Union.—*Daily Register*.

Price in half morocco or half calf bindings, \$3 50. Paper covers for mailing, \$3 00.

FIRST PREMIUM AGAIN.

R. H. VANCE,

Corner of Sacramento & Montgomery Sts.

Has, by the superiority of his DAGUERREOTYPES and AMBROTYPES, again received

THE FIRST PREMIUM

Awarded by the "STATE FAIR" in 1856, being the THIRD TIME received against all competitors.

TO THOSE WHO WISH SOMETHING NEW AND BEAUTIFUL,

We have purchased the PATENT RIGHT of CUTTING'S AMBROTYPES FOR THIS STATE, and are now prepared to take them in a style

Unequaled in the United States,

of any size—from the smallest Miniature to life size. I would say to all who have been deceived and swindled with bogus pictures, not to condemn this new and beautiful invention until they have seen the

GENUINE AMBROTYPES.

They are said to be the most durable Pictures known, as neither acids, water, or dampness of any kind can affect them. Those having Daguerreotypes which they wish to preserve forever, would do well to have them copied in Ambrotypes.

Having secured the assistance of another of the best Artists in the State, together with all new improvements direct from New York, we are now fully prepared to execute PHOTOGRAPHS by thousands, at greatly reduced prices. We are also prepared to go to any part of the City or State to execute views of Buildings, Landscapes, Machinery, Mining Claims, or anything of the kind, on reasonable terms and at the shortest notice.

Groups of from two to twenty persons are taken perfect. Also, persons in Regalia, and Military Dress, are taken without reversing insignias or letters. Children taken by this new process in less than one second.

We still continue to execute our splendid PREMIUM DAGUERREOTYPES as usual. Having made great and extensive additions to our Gallery, for the purpose of making and exhibiting our Ambrotypic Pictures, we would be pleased to have our work examined.

OUR GALLERY IS FREE TO ALL.
